

Animal and Plant Health Inspection Service, USDA

§ 93.400

equine infectious anemia,¹⁹ and such other tests that may be required by the Administrator to determine their freedom from other communicable diseases. Such horses shall also be subjected to such other inspections and disinfections deemed necessary by the Administrator, and they shall be released from quarantine only if found to be free from any communicable disease upon inspection.

[55 FR 31495, Aug. 2, 1990, as amended at 56 FR 15489, Apr. 17, 1991; 58 FR 45238, Aug. 27, 1993; 59 FR 67614, Dec. 30, 1994; 60 FR 5128, Jan. 26, 1995; 61 FR 39853, July 31, 1996; 61 FR 52246, Oct. 7, 1996. § 93.325 Horses from Mexico.

Horses offered for entry from Mexico shall be inspected as provided in §§ 93.306 and 93.323; shall be accompanied by a certificate and otherwise handled as provided in § 93.314; and shall be quarantined and tested as provided in § 93.324: *Provided*, That horses offered for importation from tick-infected areas of Mexico shall be chute inspected, unless in the judgment of the inspector a satisfactory inspection can be made otherwise. If upon inspection they are found to be apparently free from fever ticks, before entering the United States they shall be dipped once in a permitted arsenical solution or be otherwise treated in a manner approved by the Administrator.

[55 FR 31495, Aug. 2, 1990. Redesignated and amended at 62 FR 56012, 56017, Oct. 28, 1997]

§ 93.326 Horses for immediate slaughter.

Horses may be imported from Mexico, subject to the applicable provi-

sions of §§ 93.321, 93.322, and 93.323 for immediate slaughter if accompanied by a certificate of a salaried veterinarian of the Mexican Government, or by a certificate issued by a veterinarian accredited by the Mexican Government and endorsed by a salaried veterinarian of the Mexican Government, thereby representing that the veterinarian issuing the certificate was authorized to do so, stating that he or she has inspected such horses on the premises of origin and found them free of evidence of communicable disease, and that, so far as it has been possible to determine, they have not been exposed to any such disease common to animals of their kind during the preceding 60 days, and if the horses are shipped by rail or truck, the certificate shall further specify that the horses were loaded into cleaned and disinfected cars or trucks for transportation directly to the port of entry. Such horses shall be consigned from a facility described in § 93.324 to a recognized slaughtering establishment and there slaughtered within 2 weeks from the date of entry. Such horses shall be moved from the port of entry in conveyances sealed with seals of the United States Government.

[55 FR 31495, Aug. 2, 1990, as amended at 57 FR 28080, June 24, 1992; 58 FR 45238, Aug. 27, 1993; 60 FR 5128, Jan. 26, 1995; 61 FR 39853, July 31, 1996. Redesignated and amended at 62 FR 56012, 56017, Oct. 28, 1997; 63 FR 3640, Jan. 26, 1998]

Subpart D—Ruminants

SOURCE: 55 FR 31495, Aug. 2, 1990, unless otherwise noted. Redesignated at 62 FR 56012, Oct. 28, 1997.

§ 93.400 Definitions.

Wherever in this subpart the following terms are used, unless the context otherwise requires, they shall be construed, respectively, to mean:

Accredited herd. An accredited herd is one that has passed at least two consecutive annual official tuberculin tests and has no evidence of bovine tuberculosis. All animals in a herd must be free from tuberculosis.

Accredited veterinarian. A veterinarian approved by the Administrator in accordance with the provisions of

¹⁹In view of the fact that official test for dourine and glanders are run exclusively at the National Veterinary Services Laboratory, Ames, Iowa, protocols for these tests have not been published and are therefore not available; copies of "Protocol for the Complement-Fixation Test for Equine Piroplasmosis" and "Protocol for the Immuno-Diffusion (Coggins) Test for Equine Infectious Anemia" may be obtained from the Animal and Plant Health Inspection Service, Veterinary Services, National Center for Import-Export, 4700 River Road Unit 38, Riverdale, Maryland 20737-1231.

part 161 of this title to perform functions specified in parts 1, 2, 3, and 11 of subchapter A, and subchapters B, C, and D of this chapter, and to perform functions required by cooperative state-federal disease control and eradication programs.

Administrator. The Administrator of the Animal and Plant Health Inspection Service or any other employee of the Animal and Plant Health Inspection Service, United States Department of Agriculture, to whom authority has been or may be delegated to act in the Administrator's stead.

Animal and Plant Health Inspection Service. Animal and Plant Health Inspection Service of the United States Department of Agriculture (APHIS or Service).

Animals. Cattle, sheep, goats, other ruminants, swine, horses, asses, mules, zebras, dogs, and poultry.

APHIS representative. A veterinarian or other individual employed by the Animal and Plant Health Inspection Service, United States Department of Agriculture, who is authorized to perform the services required by this part.

Area veterinarian in charge (AVIC). The veterinary official of APHIS who is assigned by the Administrator to supervise and perform the official animal health work of APHIS in the State concerned.

As a group. Collectively, in such a manner that the identity of the animals as a unique group is maintained.

Authorized USDA representative. An APHIS Veterinary Services employee, a USDA Food Safety and Inspection Service inspector, a State representative, an accredited veterinarian, or an employee of an accredited veterinarian, slaughtering establishment, or feedlot who is designated by the accredited veterinarian or management of the slaughtering establishment or feedlot to perform the function involved. In order to designate an employee to break official seals, an accredited veterinarian or the management of a slaughtering establishment or feedlot must first supply in writing the name of the designated individual to the APHIS AVIC in the State where the seals will be broken. Additionally, the management of a slaughtering establishment or feedlot must enter into

an agreement with Veterinary Services in which the management of the facility agrees that only designated individuals will break the seals, that the facility will contact an APHIS representative or USDA Food Safety and Inspection Service inspector immediately if the seals are not intact when the means of conveyance arrives or if the animals being transported appear to be sick or injured due to transport conditions, and that the facility will cooperate with APHIS representatives, USDA Food Safety and Inspection Service inspectors, and State representatives in maintaining records of sealed shipments received.

Bovine. *Bos taurus*, *Bos indicus*, and *Bison bison*.

Bovine spongiform encephalopathy (BSE) minimal risk region. A region listed in §94.18(a)(3) of this subchapter.

Brucellosis certified free herd. A herd in which all eligible cattle in the herd were negative to brucellosis tests under the Canadian requirements and which is officially certified by the Canadian Government as a brucellosis free listed herd.

Brucellosis certified-free province or territory of Canada. A province or territory of Canada in which all herds of cattle are brucellosis certified free. The brucellosis certified free provinces and territories of Canada are Alberta, British Columbia, Manitoba, New Brunswick, Newfoundland (including Labrador), Northwest Territories, Nova Scotia, Ontario, Quebec, Prince Edward Island, Saskatchewan, and Yukon Territory.

Camelid. All species of the family *Camelidae*, including camels, guanacos, llamas, alpacas, and vicunas.

Cattle. Animals of the bovine species.

Cervid. All members of the family *Cervidae* and hybrids, including deer, elk, moose, caribou, reindeer, and related species.

Communicable disease. Any contagious, infectious, or communicable disease of domestic livestock, poultry or other animals.

Department. The United States Department of Agriculture (USDA).

Designated feedlot. A feedlot that has been designated by the Administrator as one that is eligible to receive sheep

and goats imported from a BSE minimal-risk region and whose owner or legally responsible representative has signed an agreement in accordance with §93.419(d)(8) of this subpart to adhere to, and is in compliance with, the requirements for a designated feedlot.

Federal veterinarian. A veterinarian employed and authorized by the Federal Government to perform the tasks required by this subpart.

Fever tick. *Boophilus annulatus*, including, but not limited to, the varieties *Americana* and *Australia*.

Flock. Any group of one or more sheep maintained on common ground; or two or more groups of sheep under common ownership or supervision on two or more premises that are geographically separated, but among which there is an interchange or movement of animals.

Herd. Any group of one or more animals maintained on common ground; or two or more groups of animals under common ownership or supervision on two or more premises that are geographically separated, but among which there is an interchange or movement of animals.

Herd of origin. The herd within which an individual animal was born and raised and that was maintained on common ground for at least 4 months. For a group of one or more animals to qualify as a herd of origin for the purposes of §93.406, animals may be added to the herd during or after the 4-month qualifying period only if they:

(1) Originated from a tuberculosis-free herd; or

(2) Originated from an accredited herd or originated from a herd of origin that tested negative to a whole herd test, and the individual cattle to be added to the herd also tested negative to any additional individual tests for tuberculosis required by the Administrator.

Immediate slaughter. Consignment directly from the port of entry to a recognized slaughtering establishment¹

¹The name of recognized slaughtering establishments approved under this part may be obtained from the area veterinarian in charge for the State of destination of the shipment. The name and address of the area veterinarian in charge in any State is available from the Animal and Plant Health In-

spection Service, Veterinary Services, National Center for Import and Export, 4700 River Road Unit 39, Riverdale, MD 20737-1231.

Inspector. Any individual authorized by the Administrator of APHIS or the Commissioner of Customs and Border Protection, Department of Homeland Security, to enforce the regulations in this subpart.

Lot. A group of ruminants that, while held on a conveyance or premises, has opportunity for physical contact with each other or with each other's excrement or discharges at any time between arrival at the quarantine facility and 60 days prior to export to the United States.

Lot-holding area. That area in a privately owned medium or minimum security quarantine facility in which a single lot of ruminants is held at one time.

Moved directly. Moved without unloading and without stopping except for refueling, or for traffic conditions such as traffic lights or stop signs.

Moved directly by land. Moved by rail, truck, or other land vehicle without unloading and without stopping except for refueling, or for traffic conditions such as traffic lights or stop signs.

Nonquarantine area. That area of a privately owned medium or minimum security quarantine facility that includes offices, storage areas, and other areas outside the quarantine area, and that is off limits to ruminants, samples taken from ruminants, and any other objects or substances that have been in the quarantine area during the quarantine of ruminants.

Official identification device or method. A means of officially identifying an animal or group of animals using devices or methods approved by the Administrator, including, but not limited to, official tags, tattoos, and registered brands when accompanied by a certificate of inspection from a recognized brand inspection authority.

Official tuberculin test. A test for bovine tuberculosis that is approved by the Administrator as equivalent to the international standard test described

Inspection Service, Veterinary Services, National Center for Import and Export, 4700 River Road Unit 39, Riverdale, MD 20737-1231.

in the Manual of Standards for Diagnostic Tests and Vaccines, Office International des Episodes, and that is administered and reported by a full-time salaried veterinary officer of the national government of the region of origin, or administered and reported by a veterinarian designated or accredited by the national government of the region of origin and endorsed by a full-time salaried veterinary officer of the national government of the region of origin, representing that the veterinarian issuing the certificate was authorized to do so.

Operator. A person other than the Federal Government who owns or operates, subject to APHIS' approval and oversight, a privately owned medium or minimum security quarantine facility.

Permitted dip. A dip permitted by the Administrator to be used in the official dipping of cattle for fever ticks and for dipping cattle and sheep for scabies.

Persons. Any individual, corporation, company, association, firm, partnership, society or joint stock company.

Port Veterinarian. A veterinarian employed by the Animal and Plant Health Inspection Service to perform duties required under this part at a port of entry.

Positive for a transmissible spongiform encephalopathy. A sheep or goat for which a diagnosis of a transmissible spongiform encephalopathy has been made.

Premises of origin. Except as otherwise used in § 93.423 of this subpart, the premises where the animal was born.

Privately owned medium security quarantine facility (medium security facility). A facility that:

(1) Is owned, operated, and financed by a person other than the Federal Government;

(2) Is subject to the strict oversight of APHIS representatives;

(3) Is constructed, operated, and maintained in accordance with the requirements for medium security facilities in § 93.412(d); and

(4) Provides the necessary level of quarantine services for the holding of ruminants in an indoor, vector-proof environment prior to the animals' entry into the United States. Quarantine services would have to include

testing or observation for any OIE listed diseases and other livestock diseases exotic to the United States, as well as any other diseases, as necessary, to be determined by the Administrator.

Privately owned minimum security quarantine facility (minimum security facility). A facility that:

(1) Is owned, operated, and financed by a person other than the Federal Government;

(2) Is subject to the strict oversight of APHIS representatives;

(3) Is constructed, operated, and maintained in accordance with the requirements for minimum security facilities in § 93.412(d);

(4) Is used for the quarantine of ruminants that pose no significant risk, as determined by the Administrator, of introducing or transmitting to the U.S. livestock population any livestock disease that is biologically transmissible by vectors; and

(5) Provides the necessary level of quarantine services for the outdoor holding of ruminants, prior to the animals' entry into the United States. Quarantine services would have to include testing or observation for any OIE listed diseases and other livestock diseases exotic to the United States, as well as any other diseases, as necessary, to be determined by the Administrator.

Quarantine area. That area of a privately owned medium or minimum security quarantine facility that comprises all of the lot-holding areas in the facility and any other areas in the facility that ruminants have access to, including loading docks for receiving and releasing ruminants, and any areas used to conduct examinations of ruminants and take samples and any areas where samples are processed or examined.

Recognized slaughtering establishment.² An establishment where slaughtering operations are regularly carried on under federal or state inspection and which has been approved by the Animal and Plant Health Inspection Service to receive animals for slaughter under this part.

²See footnote 1.

Region. Any defined geographic land area identifiable by geological, political, or surveyed boundaries. A region may consist of any of the following:

- (1) A national entity (country);
- (2) Part of a national entity (zone, county, department, municipality, parish, Province, State, etc.);
- (3) Parts of several national entities combined into an area; or
- (4) A group of national entities (countries) combined into a single area.

Ruminants. All animals which chew the cud, such as cattle, buffaloes, sheep, goats, deer, antelopes, camels, llamas and giraffes.

State representative. A veterinarian or other person employed in livestock sanitary work by a State or political subdivision of a State who is authorized by such State or political subdivision of a State to perform the function involved under a memorandum of understanding with APHIS.

State veterinarian. A veterinarian employed and authorized by a State or political subdivision of a State to perform the tasks required by this subpart.

Suspect for a transmissible spongiform encephalopathy. (1) A sheep or goat that has tested positive for a transmissible spongiform encephalopathy or for the proteinase resistant protein associated with a transmissible spongiform encephalopathy, unless the animal is designated as positive for a transmissible spongiform encephalopathy; or

(2) A sheep or goat that exhibits any of the following signs and that has been determined to be suspicious for a transmissible spongiform encephalopathy by a veterinarian: Weight loss despite retention of appetite; behavior abnormalities; pruritus (itching); wool pulling; biting at legs or side; lip smacking; motor abnormalities such as incoordination, high stepping gait of forelimbs, bunny hop movement of rear legs, or swaying of back end; increased sensitivity to noise and sudden movement; tremor, "star gazing," head pressing, recumbency, or other signs of neurological disease or chronic wasting.

Swine. The domestic hog and all varieties of wild hogs.

Temporary inspection facility. A temporary facility that is constructed of metal panels that can be erected and broken down alongside the transportation vessel carrying ruminants that are imported into the United States in accordance with § 93.408 of this subpart and that will be quarantined at a minimum or medium security quarantine facilities located more than 1 mile from the port of entry.

Tuberculosis-free herd. A herd which is not known to be infected with bovine tuberculosis (*M. bovis*) and which is certified by the Canadian Government as a tuberculosis-free herd.

United States. All of the States of the United States, the District of Columbia, Guam, Northern Mariana Islands, Puerto Rico, the Virgin Islands of the United States, and all other Territories and Possessions of the United States.

Veterinary Services. The Veterinary Services unit of the Department.

Wether. A castrated male sheep or goat.

Whole herd test. An official tuberculin test of all cattle in a herd of origin that are 6 months of age or older, and of all cattle in the herd of origin that are less than 6 months of age and were not born into the herd of origin, except those cattle that are less than 6 months of age and:

(1) Were born in and originated from a tuberculosis-free herd; or

(2) Were born in and originated from an accredited herd or originated from a herd of origin that has tested negative to a whole herd test, and the individual cattle have tested negative to any additional individual tests for tuberculosis required by the Administrator.

World Organization for Animal Health (OIE). The international organization recognized by the World Trade Organization for setting animal health standards, reporting global animal situations and disease status, and presenting guidelines and recommendations on sanitary measures related to animal health.

Zoological park. A professionally operated zoo, park, garden or other place, maintained under the constant surveillance of a Doctor of Veterinary Medicine, for the exhibition of live animals,

pigeons or birds, for the purpose of public recreation or education.

[55 FR 31495, Aug. 2, 1990, as amended at 56 FR 366, Jan. 4, 1991; 58 FR 68509, Dec. 28, 1993; 60 FR 13900, Mar. 15, 1995; 61 FR 17237, Apr. 19, 1996. Redesignated and amended at 62 FR 56012, 56017, Oct. 28, 1997; 66 FR 20189, Apr. 20, 2001; 68 FR 35533, June 16, 2003; 69 FR 64651, Nov. 8, 2004; 70 FR 546, Jan. 4, 2005; 70 FR 71217, Nov. 28, 2005; 71 FR 12996, Mar. 14, 2006; 71 FR 29772, May 24, 2006]

§ 93.401 General prohibitions; exceptions.

(a) No ruminant or product subject to the provisions of this part shall be brought into the United States except in accordance with the regulations in this part and part 94 of this subchapter;³ nor shall any such ruminant or product be handled or moved after physical entry into the United States before final release from quarantine or any other form of governmental detention except in compliance with such regulations. Notwithstanding any other provision of this subpart, the importation of any ruminant that has been in a region listed in § 94.18(a)(1) or (a)(2) of this subchapter is prohibited. *Provided, however,* the Administrator may upon request in specific cases permit ruminants or products to be brought into or through the United States under such conditions as he or she may prescribe, when he or she determines in the specific case that such action will not endanger the livestock or poultry of the United States.

(b) Except for ruminants prohibited entry, the provisions in this part relating to ruminants shall not apply to healthy ruminants in transit through the United States if they are not known to be infected with or exposed, within 60 days preceding the date of export from the region of origin, to communicable diseases of such ruminants, if an import permit⁴ has been obtained under § 93.404 of this chapter and all

conditions therein are observed; and if such ruminants are handled as follows:

(1)(i) They are maintained under continuous confinement in transit through the United States aboard an aircraft, ocean vessel, or other means of conveyance; or

(ii) They are unloaded, in the course of such transit, into a ruminant holding facility which is provided by the carrier or its agent and has been approved⁵ in advance by the Administrator in accordance with paragraph (b)(3) of this section as adequate to prevent the spread within the United States of any livestock disease, and they are maintained there under continuous confinement until loaded aboard a means of conveyance for transportation from the United States and are maintained under continuous confinement aboard such means of conveyance until it leaves the United States; the import permit will specify any additional conditions necessary to assure that the transit of the ruminants through the United States can be made without endangering the livestock or poultry of the United States, and that Department inspectors may inspect the ruminants on board such means of conveyance or in such holding facility to ascertain whether the requirements of this paragraph are met, and dispose of them in accordance with the Animal Health Protection Act (7 U.S.C. 8301 *et seq.*) if such conditions are not met; and

(2) The carrier or its agent executes and furnishes to the collector of Customs at the first port of arrival a declaration stating that the ruminants will be retained aboard such means of conveyance or in an approved holding facility during transshipment as required by this paragraph.

(3) Provisions for the approval of facilities required in this paragraph are:

(i) They must be sufficiently isolated to prevent direct or indirect contact with all other animals and birds while in the United States.

(ii) They must be so constructed that they provide adequate protection against environmental conditions and can be adequately cleaned, washed and disinfected.

³Importations of certain animals from various regions are absolutely prohibited under part 94 because of specified diseases.

⁴Such permit may be obtained from the Animal and Plant Health Inspection Service, Veterinary Services, National Center for Import-Export, 4700 River Road Unit 38, Riverdale, Maryland 20737-1231. Requests for approval of such facilities should also be made to the Administrator.

⁵See footnote 4 to subpart D.
